

# Locations and Facilities

## Here is how a place becomes a way.

The transformative UB experience happens not just in classrooms and laboratories, but all around our lively campuses, indoors and out. That's why our buildings and grounds combine functionality with fun, comfort with connectivity, and looks with smarts. Take a look at how our campuses stack up—and stand out.

### With choice spaces to live ...

**1** More than 7,000 students call our residence halls and campus apartments home. They make up vibrant centers where students from all walks of life and around the world become friends and get involved. Our living and learning communities prove that a dorm can provide much more than a spot to sleep—it can be a meaningful place to grow intellectually and socially, together with other students who share common goals and interests.

An array of 3,200 photovoltaic panels that measures a quarter mile in length, UB's solar strand produces enough carbon-free energy per year to power hundreds of student apartments.

### With major hotspots ...

**3** When the Jacobs School of Medicine and Biomedical Sciences relocated downtown to anchor a state-of-the-art comprehensive academic health center. When the Center for the Arts was voted best large music venue in Western New York. When we received our ninth LEED certification for green design. When Hayes Hall was named to the National Register of Historic Places. UB's buildings often make headlines—and always make an impact.

### In view of the whole world

**5** Through the years we've grown from one campus to two, and then from two campuses to three, and we continue to get bigger and better through bold moves and careful planning. Along with our people and programs, our facilities are an important part of Buffalo's resurgence, as ambitious individuals from all over the globe come to our doors.

### ... and reimaged places to learn

**2** Lecture halls and libraries? We've got plenty, as well as seminar rooms, computing sites and study spaces. But we're also creating expanded learning landscapes that include interactive labs, studios, makerspaces and collaborative hubs—multipurpose centers where students create as well as absorb knowledge.

### ... and lots of cool surprises

**4** In addition to the spaces you might expect from a great university campus, like top-notch athletic facilities and a variety of eateries, shops and services, you'll also find gems unique to UB, such as a 60-acre recreational lake with its own island, a leading academic supercomputing facility, an award-winning, student-designed solar-powered house, and the only museum in the United States dedicated exclusively to the brain.

### QUICK FACTS

We're always building on our strengths. The following is just a snapshot in time of our evolving footprint.

- Three campuses: North, South and Downtown
- Nearly 200 total buildings on more than 1,350 combined acres
- 11 library units
- 13 residence halls
- Five apartment complexes
- 35 dining locations
- More than eight theaters and performance venues, including the Center for the Arts' 1,800-seat Mainstage Theatre
- Athletics arena with 6,000-seat gym, 50-meter pool and more
- Outdoor sports stadiums
- UB Commons, an on-campus mini-mall
- Two art galleries
- Child care centers on two campuses
- Affiliations with several teaching hospitals and health care systems
