

Community of Scholars Professional Development Series presents overview of Drug Development core

Posted on 02/09/17 at 04:27 pm

Drug Development Core Director Gene D. Morse, PharmD, FCCP, BCPS

Role of the Drug Development Core in the UB Clinical and Translational Science Institute

The main objective of the University at Buffalo Clinical and Translational Science Institute (CTSI) [Drug Development core](#) is to foster innovation in drug development and clinical therapeutics research. While providing expert mentoring for researchers from the Buffalo Translational Consortium, the core also collaborates with industry partners, arranges access to CTSI core laboratory facilities that specialize in drug development, and helps investigators to prepare a top-flight grant application or cutting-edge research protocol.

Drug Development Core Director Gene D. Morse, PharmD, FCCP, BCPS, SUNY Distinguished Professor in the UB School of Pharmacy and Pharmaceutical Sciences Department of Pharmacy Practice, will present an overview outlining some of the services and resources the core provides to investigators on Wednesday, February 22, 12 - 1 p.m., in 339 Cary Hall, South Campus, UB.

[Registration for this event is due February 19.](#)
