Summer Research Fellowships for Medical Students Now Accepting Applications

The NIH funded T35 training grant entitled “Research in Infectious Diseases, Microbiology and Immunology for Medical Students” is now accepting applications from first year medical students for research fellowships for the summer of 2013. This joint UB-Roswell Park program supports 10 week fellowships for 6 medical students to perform mentored research projects during the summer between first and second of medical school.

This is the second year of the program. The first year was a huge success by all accounts. The first class of “T35 Fellows” completed fellowships in the summer of 2012

2012 Fellows, their faculty mentors and the titles of their projects.

- Fellow: Moyukh Ghosh
- Mentor: Sandra Gollnick PhD
- Project: Role of TLR4 in Prostate Cancer

- Fellow: Aleksandr Kalininskiy
- Mentor: Mark O’Brian, PhD
- Project: Analysis of Irr binding sites in *Bradyrhizobium japonicum*

- Fellow: Chinel Ogbudinkpa
- Mentor: Amy Jacobs PhD
- Project: Structure-based Drug Design to Inhibit HIV Entry into the Cell

- Fellow: Christopher T. Sciria
- Mentor: Thomas A. Russo MD CM
- Project: Investigating the virulence of the hypervirulent variant of *Klebsiella pneumoniae*

- Fellow: Matthew Stevens
- Mentor: Elizabeth Repasky PhD
- Project: Cold Stress Contributes to Therapeutic Resistance in Models of Pancreatic Cancer

- Fellow: Lauren Schmidt
- Mentor: Anthony Campagnari PhD
- Project: Generation and Characterization of *Acinetobacter baumannii* Biofilm Mutants
