Gustavo Della Flora Nunes,
Institute for Myelin and Glia Exploration
PhD Student, Feltri Lab

Gustavo Della Flora Nunes received his B.S. degree in Biomedical Sciences from The Federal University of Rio Grande do Sul (Brazil) in 2014. During his undergraduate years, he worked in the Translational Research Group in Autism Spectrum Disorder under supervision of Dr. Carmen Gottfried. He also participated in a 1-year study abroad program at University at Buffalo.

In 2015, Gustavo completed his Masters' degree in Neuroscience at The Federal University of Rio Grande do Sul (Brazil), with a thesis entitled "Animal model of autism by prenatal exposure to valproic acid: analysis of excitatory and inhibitory synapses". Currently, he is a PhD student in the Department of Biochemistry at the University at Buffalo. As part of his training, he is working in the Feltri Lab at Institute for Myelin and Glia Exploration. He is investigating the role of prohibitins in myelination and axonal maintenance.
