[Working toward the next battery breakthrough \(w/ Video\)](#)

[PhysOrg](#) 2010-06-08

Esther Takeuchi developed the battery that made possible the first implantable cardiac defibrillators. Now she is applying her unique perspective on how to coax the best performance out of battery chemicals to the electrical grid. Credit: [University at Buffalo](#) If battery-making is an art, then University at Buffalo scientist Esther Takeuchi is among its most prolific masters, with more than 140...
