

## UB RENEW Distinguished Lecture Series in Energy, Environment & Water Sustainability

### *An overview of SolarCity's Business, Technologies, Manufacturing Plans and Outlook for Solar Energy*

**When:** 10:00 - 11:30a.m., March 9, 2016 (presentation followed by a discussion)

\*Light refreshments served from 9:40am-10:00am in Davis Hall Atrium

**Where:** Davis Hall 101, North Campus, University at Buffalo

**Featuring:** Solar City Co-Founder and Chief Technology Officer Peter Rive.

Mr. Rive has helped grow SolarCity into the largest full-service solar provider in the nation. In his role as CTO, Peter develops the strategy and direction of SolarCity's next-generation software and hardware technologies including battery systems, solar mounting hardware and solar module technology. He also leads the company's collaborative efforts with the goal of creating a cleaner, more affordable and more resilient way to provide electricity to homes and businesses.
