AGENCY:  2015 Beckman Postdoctoral Fellows Award

PROGRAM:  Complete Guidelines can be found at 2015 Beckman Postdoctoral Fellows Award

OBJECTIVES:  The purpose of the Arnold O. Beckman Postdoctoral Fellows Award is to initiate and support post-Ph.D. postdoctoral fellows at research institutions across the United States, who have the highest potential for success in an independent academic career in chemistry and the life sciences, thus leading to the development of new tools and methods while providing assistance during their transition from “mentored yet independent” postdoctoral to an independent, tenure-track position. On the basis of the experience gained during the term of fellowship, the Fellow should be prepared to compete very effectively for academic openings in research universities throughout the nation. These individuals are expected to become the next generation of leaders and innovators in science, engineering, and technology.

ELIGIBILITY RESTRICTIONS:  UB may submit one proposal for the 2015 Beckman Postdoctoral Fellows Award.  The postdoctoral candidate must be a U.S. citizen or permanent resident.

FUNDING INFORMATION:  The award amount will range from $57,000 - $67,000 based on research experience with 75% of the award going towards the stipend, which may be supplemented from other sources, and 25% used towards research expenditures.

INTERNAL REVIEW PROCESS:  Application material must be submitted to the Arnold and Mabel Beckman Foundation by Monday, December 1, 2014.  Due to the application limitation, if you are interested in applying, please submit a letter of intent that includes the candidates CV, the mentors CV, a 2 page description of the proposed research project and a 1 page description of the proposed mentorship and career development plan to Dr. Kenneth Tramposch at ovpr.limitedsubmission@research.buffalo.edu by October 20, 2014.
