Eric Pitman Summer Workshop
June 27th - July 03, 2024

Participating students will have hands-on experience sequencing bacterial DNA from local water samples, and performing bioinformatic data analysis using computer programming and AI. Students will also spend time talking with computer science and data professionals and touring locations on the Buffalo Niagara Medical Campus.

This workshop is free and lunch will be provided!

9:30 AM - 3:30PM
