About Automated Dynamics:

Automated Dynamics is an emerging leader in the fabrication of advanced composite parts and automated manufacturing equipment. They are based in Niskayuna, NY just outside of Troy.

Since 1984, Automated Dynamics has been actively working with a wide range of clients to develop industry-leading composite structures that are well suited for even the most demanding engineering environments. With their state-of-the-art automated processing equipment, ADC is at the forefront of composites technology tirelessly working to push the boundaries of additive manufacturing.
