Errata for Chaves & Putnam's 2020 *Unbounded Dependency Constructions: theoretical and experimental perspectives*,
Oxford Surveys in Syntax and Morphology 10,
Oxford University Press.

- **Page 11:** Boeckx (2008, ch. 3) should have read Boeckx (2012, ch. 3).

- **Pages 12 & 163:** Steedman (2002, 59–66) should have read Steedman (2001, 59–66).

- **Page 60, footnote 3**: (...) *but so it its unextracted counterpart* (...) should have read: (...) *but so is its unextracted counterpart* (...)

- **Page 85:** in example (99c) *There are people in this world$_i$* (...) the subscript $_i$ should have been added to the word *people* rather than to the word *world*.

- **Page 89:** Examples 112c and 112d should be removed, as they are not relevant.

- **Page 108:** in the first sentence of example (166d) replace 'B:' with 'A:'.

- **Page 110:** in example (174) there is a string '$arrow \rightarrow hit(x,y)$' which should have read: '$arrow(x) \rightarrow hit(x,y)$'

- **Page 131:** (...) *by matching but uninterpretable features* should have read *by matching uninterpretable features*

- **Page 150**: (...) *In order to progress into lower zones of Marr's description level* (...) should have read: (...) *In order to progress into lower levels of description* (...)

- **Page 154**: (...) *and argues that* phases (...) should have read: *and argue that* phases (...)

- **Page 159**: *You made more mistakes$_i$ than Robin made _* is missing a subscript: *You made more mistakes$_i$ than Robin made _$_i$*

- **Page 164**: (...) *the former are lists in* GAP (...) should have read: (...) *the former are listed in* GAP (...)

- **Page 166, ft.3**: *(Sag et al., 2003, ch. 7)* should have read: *Sag et al. (2003, ch. 7)*

- **Page 182, footnote 11**: (...) *amounts to appending '$\oplus$' to* RESTR *lists.* (...) should have read (...) *amounts to appending* RESTR *lists.* (...)

- **Page 187**: (...) *the possessive is NP is not extractable.* (...) should have read ...) *the possessive is NP is not extractable. See Runner et al. (2006) for relevant evidence that reflexive binding to possessors involves binding-theory-exempt logophors.*

- **Page 196**: (...) *predicts the Element Constraint discussed in §3.2* (...) should have read: (...) *predicts the Conjunct Constraint discussed in §3.2* (...)

- **Page 228**: On footnote 6, the string *typo graphical* should have read *typographical*.

- **Page 232**: (...) *SE = 0.039* (...) should have read (...) *SD = 0.039* (...)

- **Page 240**: (...) *must be important relevant enough* (...) should have read: (...) *must be important or relevant enough* (...)

- **Page 244**: (...) *feature specify which individuals* (...) should have read: (...) *features specify which individuals* (...)

- **Page 244**: in Figure 7.1 the value of the feature FOCUS should have been '$\langle \rangle$'.

- **Page 245**: (...) *such as lack or auxiliary inversion* (...) should have read (...) *such as lack of auxiliary inversion* (...).

- **Page 257**: the sentence (...) *for movement-based accounts.* has an extra period at the end.
