

Capabilities Human and Machine

1-5pm, Friday, April 20, 2018 • 126 Bonner Hall, University at Buffalo, Buffalo, NY

A capability is an attribute of a person, a machine, or a system which brings benefits when realized. This meeting is an attempt to advance the understanding of what capabilities are, of how capabilities information should be represented and used in information systems.

Schedule

Barry Smith (UB): Defining 'Capability'

Peter Koch (Villanova): Representing Human Capabilities

Tom Hagedorn (UMass): Representing Capabilities for Product Design

Farhad Ameri (Texas State):

Keynote Lecture: Representing Manufacturing Capabilities
