Tips on Storing and Labeling Your Hazardous Waste

Questions? Call Environment, Health & Safety at 829-2401

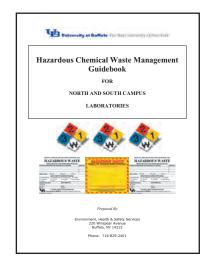

Remember to:

- Put a label on a container when you begin to fill it (as the first drop is added). For very small containers, punch a hole in the label and attach with a twist-tie.
- Store waste according to compatibility group.
- Fill liquid containers only to 90% full to prevent overflow, leakage or over pressurization.
- Inspect your waste accumulation area weekly.
- Fax in (646-6100) your EH&S Hazardous Waste Disposal Form (available at www.ehs.buffalo.edu) for waste pickup immediately after container is full.

Note - EH&S CANNOT:

- Pickup waste that is not labeled or has information missing from the label
- Pickup "unknowns" call our Service Request Line (829-2401) for assistance with unknown chemicals.

Follow the guidance in the EH&S "Hazardous Chemical Waste Management Guidebook" Use Name - no formulas or symbols
