Portal Launched to Request CTSA Services

A new portal to request Clinical and Translational Science Award (CTSA) services has been launched on the Clinical and Translational Research Center website http://buffaloctrc.org/.

By clicking on the "Request a CTSA Service" button, researchers, trainees and staff interested in CTSA services will have an opportunity to create an account (with preferred contact e-mail, and either UBIT sign-in or other username and password).

Once logged in, there is a menu of the following CTSA Cores each with a list of services as well as a text box to provide any additional details.

A representative of the CTSA Core will respond directly to each person regarding his/her request.

Drug Development

Drug discovery and formulations

Pre-clinical

PK/PD Modeling

Phase I/II Clinical Trials

Biostatistics, Epidemiology and Research Design (BERD)

Statistical consultation

Statistical analysis of existing data

Grant development

Protocol development

Community Engagement
