

Community Partnership Development Seed Grant Program

Request for Proposals 2027 Submission

The University at Buffalo [Clinical and Translational Science Institute](#) (CTSI) has a vision to advance and accelerate clinical and translational science to improve health in our community and the nation. Our CTSI and Buffalo Translational Consortium – the region’s leading academic, clinical and research institutions in Buffalo, with influential community partners – have established genuine, enduring partnerships to implement translational science strategies and improve health for all.

The UB CTSI provides seed grants that support the planning of community-based participatory research partnerships and engagement of communities on research teams. The goal is to prepare community-academic partnerships to successfully collaborate on the design of research projects. This RFA does not require research implementation as part of the proposed project to be funded. However, if research elements are included, they should be secondary to partnership development.

The projects must address:

- Health challenges focusing on community needs or promoting a positive health environment.
- How the partnership plans for the submission of a [CTSI Pilot Study Program](#) or other funding application. The Community Partnership Development Seed Grant does not support research but rather the collaborative planning of a research project.

One to four seed grants, ranging from \$2,500 to \$10,000, will be awarded to community-academic teams for:

- Developing community-engaged research partnerships that align with the mission, vision, and culture of the partnering community-based organization.
- Aligning priorities and exploring possibilities for collaboration (for example: program evaluation, intervention developments, resource development).
- Developing innovative community-engaged research proposals to be submitted for CTSI Pilot Study Program and other external funding opportunities.

Eligibility Criteria

Grants are awarded only to teams co-led by researchers and community partners in which each partner has an essential role. Proposals must exhibit active engagement between partners and demonstrate that the topic area is of mutual interest.

Community applicants can be:

- 501(c)(3) community-based organizations in Western New York
- Grassroots organizations
- A coalition, collaborative, or other community task force

Researcher applicants can be:

- Full-time faculty member at UB or an institution within the [Buffalo Translational Consortium](#)

Awards may fund (but are not limited to) partnerships that:

- Develop a research or intervention program that addresses a health challenge or need in the community.
- Develop plans/proposals for funding from other funding agencies.
- Obtain technical assistance or educational activities to develop partnerships.
- Create shared goals, plans, policies, to work together more effectively.
- Disseminate best practices, information, or research findings.
- Facilitate open dialogue around strengths, challenges, and research opportunities to address community health needs.
- Develop innovative methods for engaging and building understanding/interest/participation of communities served by the CTSI.
- Build capacity for meaningful participation in partnered research (e.g., developing advisory committees, training on research design/methods, ethics training, community context, community engagement mechanisms, etc.).

Proposed activities must be completed by December 31, 2027. Please note that no-cost extensions are not allowed.

Application Process

Applying for funding involves a two-tiered process:

- Submission of a Letter of Intent (LOI), and
- Submission of a full proposal (if invited, following review of the LOIs)

Letter of Intent Submission

There is a two-page limit for LOIs.

The first page should provide:

- Project title in plain language.
- Names/titles of both the academic lead and the community lead and their organizational affiliations.

The second page (500 words maximum) should include the following sections:

- Specific aim(s) of the proposed work to be supported by the seed grant.
- Succinct summary of proposed activities.
- Clear statement of the significance of the partnership.
- Expected outcomes and potential application of the partnership.
- How the funding will lead to future partnered research and further funding.

DUE DATE: October 6, 2026

LOIs should be submitted as a single PDF in Arial 11-point font, single-spaced text, 0.5-inch margins.

Submissions must be emailed to Engageub@buffalo.edu. All applicants will be notified within three weeks after the deadline with a decision as to whether their proposal has been selected for submission of a full proposal.

Full Proposal Submission (by invitation)

Invited applicants should use the following template.

Page 1:

- Completed title page template (see attached)

Page 2:

- Succinct summary of the aim(s) and proposed activities to build the partnership. This should be written in plain language and able to stand alone. Include the shared health interest(s) you will explore or build upon together, community of focus and the main aim of your partnership.
- Five key words relevant to your partnership.

Pages 3-5 (3-page limit):

- Statement of significance.
- Brief description of partnership (partners/history/capacity/partner roles for proposed activities).
- Brief description of specific aims and activities to be funded, including how award will lead to a sustained partnership and future research collaboration and funding.
- Potential outcomes and application in the community including possible hurdles and how they will be addressed.
- Timeline with specific milestones to be accomplished by December 31, 2027.
- How the seed grant funding will lead to future partnered research funding. We encourage applicants to submit proposals to the [CTSI Pilot Studies Program](#).

Additional Information

- References (if applicable). Please note that references are not included in the page limit.
- Budget and justification (1-page limit): The maximum allowable budget is \$10,000 direct costs; there are no indirect costs. Budgets under the \$10,000 cap are encouraged. Smaller budgets that fill a gap in current work will be reviewed favorably. All expenses charged to the project must follow the most restrictive rule as outlined in the Uniform Guidance, the sponsor terms, and conditions or UB's policies. In addition, expenditures must follow the cost principles, of reasonable, allowable, allocable, and consistently treated. When writing the budget justification, please state how this expense aligns with the research plan. Note that faculty salaries/fringe, tuition, and equipment are not allowable expenses on seed grants. Conference travel and publication costs are not allowable, and food costs will be evaluated for allowability. The budget should be allocated appropriately between UB/Buffalo Translational Consortium institution and community partner(s) and the justification should be reflective of the needs of the project. (There is no required split.)
- Provide a brief timeline of activities/expenses in a chart format.
- IRB project approval: Any research activities must be submitted to the IRB by seed grant submission date. Proof of IRB submission must accompany the final proposal packet.
- NIH biosketches: An [NIH biosketch](#) for each partner should be provided (5-page limit per biosketch). The personal statement in the biosketch should clearly state the person's role as it pertains to the seed grant project. Resume or CV of Community Lead will suffice for community partners.

- Appendix: If this project has been submitted previously to another funding source, please include that critique.

DUE DATE: November 16, 2026

Full proposals should be submitted as a single PDF in Arial 11-point font, single-spaced text, 0.5- inch margins. Proposals must be emailed to Engageub@buffalo.edu All applicants will be notified by mid-December with a decision as to whether their proposal has been selected for funding.

Seed Grant Timeline

Information Session	September 9, 2026
Letters of intent due	October 6, 2026
Notification of applicants	Within three weeks following LOI submission deadline
Full proposals due	November 16, 2026
Full proposal selection, notification of applicants	Mid-December 2026
Funding start date	January 1, 2027
Introduction to Community Engagement Team	First two weeks of January 2027
Scope of Work with revised budget and timeline	January 21, 2027
3-month timeline and budget check in	April 2027
Mid-Year Report and Meeting (including budget expenditure rate report)	July 2027
9-month timeline and budget check in	October 2027
Project Presentation in CTSI Colloquium	December 2027
Final Report	January 15, 2028

Review Process

All applications will be reviewed by both community and academic representatives with experience in and respect for community-academic collaboration, promoting a positive health environment, and research. Applications will be rated using the following criteria:

- Significance.
- Qualifications of the partners and strength of the partnership.
- Quality and feasibility (with activities and timeline) in the context of the budget and duration of the award.
- Strength and potential for future research collaboration and funding.
- Alignment with application priorities, i.e., promoting a positive health environment, health challenges, etc.
- Rationale and utilization of proposed budget. Budget requested must align with the work proposed. Smaller budgets that fill a current need will be reviewed favorably.

Post Award Information

Submit Scope of Work and Revised Budget

- Includes finalized budget, grant terms and agreements, scope of work, and list of key personnel.
- Must be approved by Academic and Community leads.

Initial Team Consultation (1 hour via Zoom)

- Before funds are released, funded teams will be required to participate in a session with the CTSI Community Engagement Team to discuss specifics of the project and how the principles of community-based participatory research can be applied.
- Announcement of awardees will be published in the CTSI newsletter and must be approved by Academic and Community leads. The content of the newsletter story will be discussed at the meeting.

Timeline and budget check-in at 3- and 9-month mark

- Assess budget expenditures and adjust the timeline and scope of work as necessary.

Mid-Project Meeting

- Teams will give updates on their projects and troubleshoot any obstacles encountered.
- Review remaining budget timeline and plans.

Final report on funded activities, lessons learned, and other outcomes.

Awardees are required to acknowledge the CTSI in all publications and presentations (specific language will be provided).

- Teams are also encouraged to consider alternative dissemination options beyond traditional venues, such as community forums, community newsletter, etc.

Awardees are required to present the progress of their projects at the annual CTSI Pilot Studies Colloquium. The colloquium is scheduled for mid- December 2026.

We encourage awardees to submit their work to research forums looking to promote a positive health environment and hosted by the University at Buffalo

Resources

Community-partnered and engaged research differs in several ways from traditional research inquiry, including the time it takes to build and maintain mutually beneficial relationships, and the ability for partners to understand and acknowledge each other's expertise and contributions.

For more information on community engaged research, please see *Principles of Community Engagement* (Third Edition) at <https://stacks.cdc.gov/view/cdc/251390>.

Join us for an information session on September 9, 2026, from 12-1 p.m. This session will provide prospective applicants with an overview of the program and answers to their questions.

Register here: https://buffalo.zoom.us/meeting/register/GUgdP_ykQxCtGNPuvPazMQ

After registering, you will receive a confirmation email containing information about joining the meeting. If you have any further questions, please e-mail Laurene Tumiel Berhalter, CTSI Community Engagement Core Director, at tumiel@buffalo.edu.

Project Title:

Statement of Responsibilities and Consent: I acknowledge that the information provided in this submission is accurate and reasonable for the scope of this project. I agree to comply with all timelines, deadlines, and deliverables of this seed grant. I give permission for this seed grant to be included in CTSI media (e.g., newsletter article, social media posts, etc.). I agree to work collaboratively with my grant partners as well as CTSI staff and Community Engagement Specialists. If at any time I cannot fulfill one of these obligations, I will notify CTSI staff so that modifications may be made in a timely way. By signing below, I agree and understand the grant responsibilities and give my consent to perform these duties to the best of my ability.
