## RESPONSIBLE CONDUCT OF RESEARCH WORKSHOP SERIES

# Authorship and Reviewer Ethics

Plagiarism constitutes a major ethical breach in the publishing arena and is one of three key elements of the definition of research misconduct (the other two being falsification and fabrication of data). This workshop session will cover the definition, forms, and scope of plagiarism, highlight some egregious cases of plagiarism, and provide some tools for detecting, dealing with, and avoiding plagiarism.

In addition, ethical guidelines and responsibilities pertaining to reviewers (i.e., manuscripts, grant applications and other privileged communications) will be presented, as well as how to appropriately "give credit where credit is due."

Case discussions will be presented to highlight the lecture content.

This workshop series is free and open to all students, fellows, faculty, and staff at UB and the Buffalo Translational Consortium.

**DATE:** Monday, March 11, 2024

**TIME:** 4:00 – 5:30 PM

**LOCATION:** Online via Zoom

**REGISTER NOW:**
