## HEALTH INEQUITIES WORKSHOP SERIES

# Implicit Bias and Health Inequities

This workshop addresses the role of implicit biases in health inequities and discusses ways to identify and overcome them. Implicit bias is a form of bias that occurs automatically and unintentionally. Nevertheless, these attitudes toward people or the association of stereotypes about people affect judgments, decisions, and behavior. Bias can influence our actions without our conscious thoughts. Healthcare professionals are not immune to implicit bias, which can influence clinician-patient interaction.

**DATE:** Thursday, April 13, 2023

**TIME:** 3:00 – 4:30 PM

**PLATFORM:** Online via Zoom

**REGISTER NOW:** <https://bit.ly/3JIYA03>
