

QUALITATIVE STUDY DESIGN AND DATA ANALYSIS WORKSHOP SERIES

## Qualitative Principles in Action

***(New Workshop Session)***

Offered for the first time, this new session of the Qualitative Study Design and Data Analysis Workshop Series delves into the real-world application of qualitative principles in research. The session features guest speaker, current K Scholar and School of Public Health and Health Professions faculty member, Denise Lillvis, PhD as she discusses her qualitative research on children in acute health care settings. Session will include applicative examples to concepts discussed earlier in the series.

Participants are invited to bring questions and ideas to share with the group. We will discuss these questions as a group offering an opportunity for collaborative learning as well as questions about individual projects to be addressed.

**DATE:** Thursday, May 25, 2023

**TIME:** 9:00am – 10:00am

**FORMAT:** In-person

**REGISTER NOW:** <https://bit.ly/3TZIzI5>
