

## GOOD CLINICAL PRACTICE WORKSHOP SERIES

# Surviving a Research Audit

**Richard J. Karalus, Ph**  
Director of Research Compliance  
Office of Research Compliance  
University at Buffalo

The Food and Drug Administration (FDA) conducts clinical investigator inspections to determine whether clinical studies are being conducted in compliance with applicable requirements. These investigations can be held with or without prior notice, therefore an investigator should always be prepared for an audit.

This workshop will provide an overview of what the FDA is looking for during an investigator audit.

This series is free and open to all students, fellows, faculty, and staff at UB and the Buffalo Translational Consortium.

**DATE:** Tuesday, February 6, 2024

**TIME:** 4:00 – 5:30 PM

**PLATFORM:** Online via Zoom

**REGISTER NOW:**
