

BERD RESEARCH BOOTCAMP WORKSHOP SERIES

Reading and Critiquing the Scientific Literature

Developing, implementing, and disseminating sound research studies requires several important steps be undertaken. Hypothesis formulation and study design often can be informed by previously completed studies published by other investigators. Thus, reviewing scientific literature is a critical skill when conducting research. Additionally, available data sets can often be used for pilot studies or in some instances to test primary hypotheses. Having an awareness of the types of datasets that are accessible, as well as their strengths and limitations can be helpful. This workshop has the following learning objectives:

1. Understand the basic steps in reviewing literature
2. Be informed on the available data sources, their potential uses and limitations.

This workshop series is free and open to all students, fellows, faculty and staff at UB, the Buffalo Translational Consortium and SUNY.

DATE: Tuesday, October 31, 2023

TIME: 4:00 – 5:30 PM

PLATFORM: Zoom

REGISTRATION: https://buffalo.zoom.us/meeting/register/tJ0pcOiurD8qGtYkbUW_eBfs5aNv_53gp7Mz

For more information, contact cmp9@buffalo.edu or **716-844-9282**.

This workshop series, previously offered in 2020, 2021 and 2023 is designed for new attendees and/or as a refresher for past participants.

EVENT SPONSORS: UB Clinical and Translational Science Institute (CTSI) Biostatistics, Epidemiology and Research Design (BERD) Core, Workforce Development Core and K Scholar Program.

This program is supported by the National Center for Advancing Translational Sciences of the National Institutes of Health under award numbers UL1TR001412 and KL2TR001413 to the University at Buffalo. The content is solely the responsibility of the authors and does not necessarily represent the official views of the NIH.
