

SCIENTIFIC COMMUNICATION WORKSHOP SERIES

Bringing Joy to Your Work through Improved Scientific Communication

ARCHANA MISHRA, MD, MS
Clinical Professor
Department of Medicine
Jacobs School of Medicine and
Biomedical Sciences
University at Buffalo

The session will explore the use of tools such as creativity, appreciative inquiry, mindfulness, narrative reflection, and improvisation to facilitate and enhance the process of scientific communication.

Whether the communicative process takes place between faculty and student, healthcare provider and patient, or colleague to colleague, improving the process of communication can lead to improved feelings of work satisfaction, better understanding of the disease state being dealt with, and an overall improved sense of well-being.

DATE: Monday, May 1, 2023

TIME: 4:00 – 5:00 PM

Translating Research into Clinical Practice Guidelines

ANNE B. CURTIS, MD
SUNY Distinguished Professor
Department of Medicine
Jacobs School of Medicine and
Biomedical Sciences
University at Buffalo

The goal of this session is to understand how the findings from translational science and clinical research performed by UB's Jacobs School faculty are incorporated into clinical practice guidelines to improve the long-term health and wellness of the WNY community.

The process by which the knowledge gained from translational, clinical, and outcomes research is synthesized into specific recommendations for patient care will be explained. Such guidelines are then used to change clinical practice and to inform advocacy and governmental groups as well as the general public.

DATE: Monday, May 1, 2023

TIME: 5:00 – 6:00 PM

PLATFORM: Online via Zoom
