

**Conlan A. Kreher**

Institute for Myelin and Glia Exploration  
Research Technician I, Feltri Lab

Conlan obtained his Bachelor of Science from Cornell University in 2014.

In 2018, Conlan joined the laboratory of Dr. Laura Feltri at the University at Buffalo. He worked on his master's project involving the study of the effect of GALC ablation in neurons. He received his Master of Arts in Biochemistry in 2020.

In Fall of 2020, Conlan joined Dr. Feltri's lab as a Research Technician to assist with the maintenance of the animal colony, assisting with image analysis and creating software tools to aid with the process of image analysis.
