

## **Luciana Frick**

Institute for Myelin and Glia Exploration  
Lab Manager, Wrabetz & Feltri Labs  
Research Assistant Professor

Dr. Luciana Frick received her Master's in Biotechnology in 2004 and her PhD in Molecular Biology in 2009 at the University of San Martin (Buenos Aires, Argentina). Dr. Frick conducted postdoctoral research in Argentina until 2012, and then joined Yale University, where she focused on neuroimmune aspects of neuropsychiatric disorders. Dr. Frick obtained research grants from the Tourette Syndrome Association and the International OCD Foundation.

In 2017, Dr. Frick joined the Institute for Myelin and Glia Exploration as Senior Research Scientist and Lab Manager for Dr. Wrabetz and Dr. Feltri. Dr. Frick brings to the Institute for Myelin and Glia Exploration her expertise in neuroimmune interactions in health and disease; and chemogenetic approaches to model neuropsychiatric disorders in mice.
