

Narayan Dhimal

Institute for Myelin and Glia Exploration
PhD Neuroscience Student, Feltri Lab

Narayan Dhimal received his degree in Biological Sciences from the University at Buffalo in 2016. After graduating, he volunteered and was hired later as a lab technician in an ophthalmology lab working on diabetic retinopathy, at the University at Buffalo.

Mr. Dhimal began his graduate studies at the University at Buffalo in 2018. Narayan started working in the Feltri laboratory in Summer 2019, studying Krabbe disease pathogenesis in the peripheral nervous system.
