

Ghjuvan'Ghjacumu Shackleford

Institute for Myelin and Glia Exploration

Post-Doctoral Research Scientist, Wrabetz Lab

Dr. Ghjuvan'Ghjacumu Shackleford received his Master in cellular and molecular biology and pharmacology from Paris Descartes University, France (2010). His thesis focused on the “Impact of oxysterols in myelination.”

He completed his Ph.D. degree in Neuroscience in Dr. Massaad's team in Paris Descartes University, France (2014). During his Ph.D. he studied the

interplay between oxysterol and the Wnt pathway during myelination in PNS and in CNS.

In 2015, Dr. Shackleford was appointed as Postdoctoral Research Scientist in Dr. Wrabetz's laboratory at the Institute for Myelin and Glia Exploration.
