

Zeey Elias

Undergraduate Assistant, Beirowski Lab

Zeey Elias is currently studying at the University at Buffalo as an undergraduate student seeking a degree in biomedical engineering.

He is interested in biomedical devices and neurosciences. His interest in neuroscience began his sophomore year of college when he took applied medical and engineering biology.

He was particularly interested in the physiological aspect of the nervous system. Specifically, an interest in neuromuscular diseases and neurodegeneration. He aspires to complete his master's degree and work in the research industry. His goal is to research axon degeneration, and a therapeutic way to decelerate and inhibit axon degeneration.
